

## SIZING YOUR TOYWATCH JELLY

1. Remove the buckle at one of the ends by pushing the spring bar by applying pressure with a small screwdriver or pushpin to the top pinhole.

2. Wrap the strap around your wrist and count how many holes from the end of the buckle to the bottom of the strap. Remove the buckle completely by repeating Step #1 on the other end of the buckle.

3. Cut the strap equally on both sides with a sharp pair of scissors (i.e. if you counted 6 holes on Step #2, cut 3 from each side) Measure carefully and be sure to cut conservatively!

4. Remount the buckle by inserting the spring bar back into the strap and squeezing it back into the buckle with a small screwdriver or pushpin.

Now enjoy your new ToyWatch Jelly!
